## Stop for Pallet exchange

In our General Conditions printed on the back of all our documents the following are stated:

### Section 3

*All pallets are regarded as part of the packing and therefore part of the trade agreement. Consequently every pallet outstanding is irrelevant to Jumbo Transport A/S.*

*Exchange of pallets can on a preceding written agreement take place against payment of a minor fee.*

In the light of:

- 5 to 10% of our total capacity is used on transporting empty pallets
- The drivers are using valuable driving hours on sorting pallets
- Security arrangements often makes it impossible for us to control the quality of the pallets
- Higher scraping of pallets
- Very time consuming administration for us and our agents
- Large financial impact due to the above and the general loss of pallets

we have decided that as per 1st January 2007 we will change our General Conditions so that the last line will be left out. This means that as from **1.1. 2007 pallets in international traffics will no longer be exchanged, not even against payment.**

In national distribution the exchange will continue but a fee of DKK 8.00 per pallet will be introduced per 1.1.2007.

We hope you will understand our decision.

Very truly yours

**Jumbo Transport as**

Ole Holbæk
